About DR. RAJENDER (RAJ) S. VARMA

H-Index: 78

Senior Scientist, Sustainable Technology Division, National Risk Management Research Laboratory, U.S. Environmental Protection Agency, 26 West Martin Luther King Drive, MS 443, Cincinnati, OH 45268, USA; E-mail: Varma.Rajender@epa.gov

URL's: http://www.epa.gov/nrmrl/std/organic_reactions.html http://www.epa.gov/nrmrl/std/green_chem_nano.html

Formerly: Chemistry Research Professor, Sam Houston State University, Texas, USA –Project Manager, Texas Research Institute for Environmental Studies (TRIES), Texas –Senior Scientist, Houston Advanced Research Center, The Woodlands, Texas, USA <u>EDUCATION</u>: -B.Sc., 1970, Panjab University, India.

-M.Sc., 1972, Kurukshetra University, India.

-Ph.D., 1976, Delhi University, India, Natural Products Chemistry; Diploma, Pulp & Paper Technology, 1977, Norwegian Institute Technology, Norway. Postdoctoral Fellow-Robert Robinson Laboratories, University of Liverpool, England. PATENTS AND PUBLICATIONS: -14 US Patents awarded some others pending.

~400 peer-reviewed papers, 6 books, 26 book chapters & 2 encyclopedia contributions. AREAS OF EXPERTISE: Development of Environmentally Benign Synthetic Methods and Chemical Protocols, Greener Synthesis of Nanomaterials and Nanocomposites and their Applications in Nano-catalysis (magnetically retrievable nano-catalysts) and Sustainable Remediation of Hazardous Pollutants [e.g. contaminated sites and streams using nanoscale iron, mercury capture from coal-fired power plants, removal of sulfur (deep desulfurization) from diesel oil etc.], Natural Products; Synthetic Organic Chemistry, Methods for Immobilization of Biomolecules on Support Surfaces; Design & Synthesis of Chemopreventive anti-cancer Agents.

<u>ABOUT RESEARCH</u>: Over 40 years of research experience in management of multidisciplinary technical programs. Extensively involved in broader aspects of chemistry that includes **development of eco-friendly synthetic methods using alternate energy input (microwave, ultrasound & mechanochemical).** Long term goals are to contribute **broad expertise in chemistry to evaluate novel and safer environmental protocols in industrial chemistry** and its impact in human health and environmental sciences. Mentor for high school, college and university students.
